NEWSLETTER

Dear Valued Customer,

Spring of 2023 has arrived, and we hope you're looking forward to warmer weather as much as we are. The heating season is drawing to a close, but we'll still be interacting with you as we provide your home and family with spring installations, fuel deliveries, air conditioning, and plumbing services. Recently, we moved our office to a new address and building, a change which consolidated our operations into one location. While it's bittersweet to leave the downtown location that my grandparents, Ray and Donna, renovated and moved into in the 1960s, our new space is a better fit for our current needs.

When we built our office, we wanted to make sure we were showcasing our premier products; Energy Kinetics System 2000 boilers, HeatFlo hot water heaters, Roth oil tanks, and LG mini-splits. Energy efficiency is important to us, and all these products feature the latest in home comfort technology. This means they can help reduce your energy use while also saving you money.

We would be absolutely delighted if you wanted to come and visit us at our new location:

Densmore Oil Company
26 Old Stonington Road
Stonington, CT 06378

Feel free to swing by at any time to take a look at these great products for your home. We're always happy to answer any questions you may have. I speak for the entire Densmore Oil team when I say that we're looking forward to the coming season and continuing to serve you.

Sincerely,

Jamie Densmore
Owner & President

What's Inside

- ✓ Ductless Mini-Split A/C Installations
- ✓ Benefits of an A/C Service Plan
- ✓ Is It Time to Replace Your Air Conditioning System?
- ✓ Upgrade Your Central A/C System
- ✓ Try a Water Treatment System

Looking to Improve Your Home's Water? Install a Water Treatment System from Densmore

If your town water or well water is lacking, our technicians can help. In order to best serve you, our team visits your home and collects a water sample to be sent out and analyzed by a partnering lab. After the sample is analyzed, we can recommend the type of water treatment system that will work best for your home and give you an estimate for the system's cost. Some types of systems that Densmore can install are:

- ✓ **Water softeners**
- ✓ **Anti-scale system**
- ✓ **Reverse osmosis systems**
- ✓ **Whole house cartridge systems**
- ✓ **Filters and neutralizers**
- ✓ **UV systems**
- ✓ **Cartridge filtration**

Reach out to Densmore to request plumbing services to improve your water quality today.

Lower Your Summer Energy Costs & Reduce Your Risk of System Failure with an A/C Upgrade

Nobody wants to enter the summer with an air conditioner that's not up to the challenge. If you invest in an A/C upgrade now, you'll enjoy savings on energy costs and the peace of mind that comes with knowing you have cooling power at your fingertips. At Densmore Oil Company, we're proud to offer equipment that will meet all of your cooling needs, including ductless mini-splits from LG and Mitsubishi.

Already Have a High-Efficiency A/C System? Check Out Our A/C Service Plan!

It's important to have regular maintenance performed on your air conditioning system, regardless of whether you have a ductless mini-split or central air. Without consistent service, the overall health and efficiency of your A/C system may degrade over time. That's why Densmore Oil offers a comprehensive A/C service plan that includes your annual tune-up, so you can rest easy knowing that your A/C system is running smoothly. Some new benefits of our A/C service plan include:

NEW

- ✓ Regular rates for after-hour service
- ✓ No AC after-hours fee
- ✓ 10% discount on refrigerant

Is It Time to Replace Your Air Conditioning System?

If your A/C system is more than 15 years old, a new ductless mini-split A/C can greatly improve your home comfort and give you access to the eco-friendlier types of refrigerants. Other benefits of installing a ductless mini-split A/C include:

- ✓ Compact, discreet, and adaptable for any living space
- ✓ Individual zoning to better control your cooling room by room
- ✓ Great for homes with or without ductwork
- ✓ Quiet, effective operation
- ✓ Supplemental heat in winter

Call Now to Schedule a Visit from our A/C Staff

Want to learn more about the benefits of a ductless mini-split A/C installation? We'd love to hear from you! Schedule a visit with Geoff, our Sales Manager, by calling our office at (860) 536-7927 to book your appointment. Our dedicated, professional customer service staff is always ready to assist you.

Do You Have an R22 Central Air Conditioning System?

Densmore Oil Can Help You Navigate an Upgrade

On January 1, 2010, the Environmental Protection Agency (EPA) implemented a ban on the production and import of R22. The EPA also banned the manufacture and installation of new R22 A/C and heat pump systems. If your A/C or heat pump was built and installed before January 1, 2010, there's a good chance that it uses R22 refrigerant.

At this point it's nearly impossible to purchase R22, and if we can get it, it's extremely expensive. Therefore, it's probably time to start thinking about a replacement. (Your outside unit may have a label that identifies the type of refrigerant type used or you can give us a call and we can confirm what type of refrigerant is in your system.) Here are some of the top signs that your central A/C system needs to be replaced:

- ✓ Lack of cool air and limited airflow
- ✓ Buildup of moisture on or around the unit
- ✓ Strange sounds, like grinding, squeaking, or chattering
- ✓ Foul smells, such as smoke or burning
- ✓ Higher energy bills than what you're used to

Densmore Oil carries many brands of central A/C systems, including brands like York, American Standard, and Mitsubishi central A/C systems, along with many more.

CALL US NOW TO SCHEDULE YOUR HOME VISIT FROM OUR A/C EXPERTS

Are you ready to have your new central A/C system installed? Please give our office a call at (860) 536-7927 and Miranda, our Service Administrator, will be happy to assist you.
